NICE FRUIT FORWARD WITH TOUCH OF SPICE GOOD ACIDITY

GOING GREEN

We at the sundried tomato feel its time to go green. One straw at a time. After looking over our total operation from energy use to waste management, we came to the conclusion that its not only smart thing to do but the right thing to do. So we have put into place recycling, the use of biodegradable and/or biocompostable to-go containers and we have started using local products to cut down on shipping wastes. We have now put into place energy and water conservation programs and have spent the time and effort to train our staff so they understand the importance of these programs. So now we are asking our customers to assist us in the endeavor, we would love to hear any suggestions from you and will take them to heart. We hope you will understand some of the inconveniences but we are sure this is worth the effort.
